INTERN PROJECT

Simple Modern Internship

Simple Modern Flashcards

- Created a flashcard game that allows new hires at simple modern to learn about products.
- The app quizzes users on product details such as SKU, size, and ornamentation.
- The product information was taken from Simple Modern's inventory system and translated into a JSON database file.
- Upon completion of quiz, users input initials then their score is pushed to a data base showing how they stack up compared to other users scores.

WORK EXPERIENCE

Simple Modern   May 2021 - July 2021

Technology Intern

Moore, Ok

- Learn how to manipulate website using Shopify, Javascript, Html and CSS.
- Created a web-based application for training new hires and testing current employees' knowledge.
- Find bugs on website and fix changes with browser dev tools to then push fixes live.
- Collaborate with manager and find ways to improve website functionality.
- Work with other teams to find technology driven solutions to various problems.

Gingerbread Nursery School   June 2015 – Present

Teacher Assistant

Norman, Ok

- Lead and train children in learning activities including reading, math, and science, as well as other developmental activities.
- Discuss new ideas for learning and opportunities to earn more training once a month with all other faculty.
- I began this job working for their summer camp functions in 2013. In August 2019, I began working part-time during the school year while completing my degree.
- As I built trust from working part-time my responsibilities increased to include making sure the facility was locked, logging child check-out times, and answering parents' concerns over the phone.
